

LifeGuard™

One Employee. One Key.

KEYING OPTIONS TO FIT YOUR FACILITY'S NEEDS

- A no-charge Key Charting System – Critical for Safety Lockout Padlocks
- Prevent duplicate keys from entering the workplace and jeopardizing your lockout/tagout program
- With Lifeguard™, record all safety padlock key codes assigned to your facility
- Complies with the “one employee, one lock, one key” directive

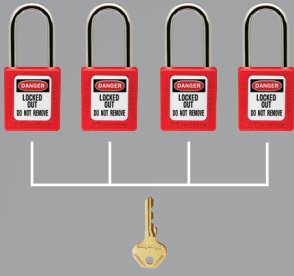

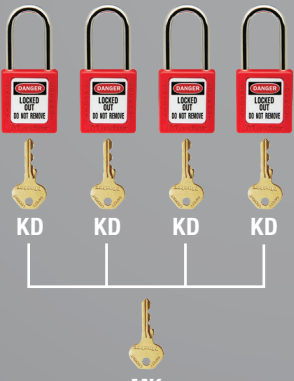

HOW TO REGISTER YOUR WORKPLACE

- Visit www.masterlock.com/business-use/safety-keying-critical-component-lifeguard for instructions and registration form
- Once registered, Master Lock will send you an End User Identification Number for your site's Key Chart. Use on future padlock orders and Master Lock will use a new key code for each padlock on the order
- When used properly, this free service ensures that each employee at your facility carries a key unique to them

ULTIMATE KEY INTEGRITY

Multiple keying options available to meet any facility system needs

KEYED DIFFERENT	 KD KD KD KD	Each lock is opened by its own unique key which does not open any other lock in the set – complying with the “one employee, one lock, one key” mantra
KEYED ALIKE	 KA	All padlocks in the set are opened by the same key so only one key is necessary to open numerous padlocks – for employees who need many locks, they still only have one key
MASTER KEYED	 KD KD KD KD MK	A master key opens all locks within the system while each lock also has its own unique key – allows for responsible removal of improperly placed or forgotten lockouts according to your emergency notification policy

Key charting is one aspect of a successful lockout program. For advice on other aspects of setting up a safety lockout program please visit www.osha.gov or your country's appropriate governing organization.

Register your facility's keying system at:
